

## FIGURES IN VOLUME I

### **Executive Summary**

Figure 1	Map of the watershed	11
----------	----------------------	----

### **Chapter 2. Plan Implementation Framework**

Figure 2-1	Plan Implementation Steps with Adaptive Management Approach	2
Figure 2-2	Plan Implementation Organizational Structure	19
Figure 2-3	WRIA 8 Plan Implementation Roles and Responsibilities Summary Matrix	20
Figure 2-4	Ratification Starts Plan Implementation Clock	22
Figure 2-5	Plan Horizon is 10 Years	23
Figure 2-6	Annual Check-in on Plan Implementation Progress	24
Figure 2-7	Initial Effectiveness Assessment in Year 3	25
Figure 2-8	Evaluating Priorities and Progress in Year	26
Figure 2-9	Convening Leaders	27

### **Chapter 3. The Science Foundation**

Figure 3-1	Historic escapement index for the Cedar River Chinook	9
Figure 3-2	Illustration of the Ballard Locks	19

### **Chapter 4. Chinook Conservation Strategy for WRIA 8**

Figure 4-1	Interactions of human activities with riverine/estuarine ecosystem	4
Figure 4-2	Building Conservation Hypotheses	5
Figure 4-3	WRIA 8 Chinook Populations and Watershed Evaluation Tiers	6
Figure 4-4	Cedar River Chinook Relative Restoration Potential Tier 1	15
Figure 4-6	North Lake Washington Chinook Relative Restoration Potential in Tier 1 Subareas	30
Figure 4-7	NLW Chinook Tier 2 Relative Restoration Potential	36
Figure 4-8	Issaquah Chinook Relative Restoration Potential	44
Figure 4-9	Relative Restoration Potential of Migratory and Rearing Areas	45
Figure 4-10	Lake Washington Segmentation and Prioritization Areas	46
Figure 4-11	Hypothetical Chinook Population Trends	52
Figure 4-12	Examples of “Best Prevailing Conditions” Line for Forest Cover under Varying Levels of Impervious Area	56

### **Chapter 5. Actions to Achieve Our Goals**

Figure 5-1	Draft: Integration of Habitat Actions to Address Process, Function, & Structure in Lower Cedar River Tributaries	18
Figure 5-2	Draft: Integration of Habitat Actions to Address Process, Function, & Structure in Middle Cedar River Tributaries	19
Figure 5-3	Draft: Integration of Habitat Actions to Address Process, Function, & Structure in North Lake Washington Tributaries	20
Figure 5-4	Draft: Integration of Habitat Actions to Address Process, Function, & Structure in Issaquah, Carey/Holder, and Issaquah Creek Tributaries (Includes Lake Sammamish Recommendations)	21
Figure 5-5	Draft: Integration of Habitat Actions to Address Process, Function, & Structure in Migratory and Rearing Corridors of WRIA 8	22

### **Chapter 6. Measures and Monitoring for Gauging Progress**

Figure 6-1	Local Cumulative Monitoring Costs Used in WRIA Plan	3
------------	---	---

### **Chapter 7. Funding Strategy**

Figure 7-1	Funding Sources in WRIA 8	4
------------	---------------------------	---

## Tables in Volume I

<b>Chapter 3.</b>	<b>The Science Foundation</b>	
Table 3-1	Factors used to evaluate and rank watershed conditions	3
Table 3-2	2003 WRIA 8 Chinook salmon population analysis matrix	8
Table 3-3	Number of redds recorded in the Cedar River 1999-2003	10
<b>Chapter 4.</b>	<b>Chinook Conservation Strategy for WRIA 8</b>	
Table 4-1	Basin-Wide Protection Recommendations for Tier 1 Subareas	12
Table 4-2	Cedar Tier 1 Reach-Level Protection Recommendations	13
Table 4-3	Cedar River Tier 1 Restoration Recommendations	14
Table 4-4	Restoration Recommendations for Cedar River Chinook Migratory and Rearing Areas	4-16
Table 4-5	Protection Recommendations for Cedar Tier 2 Subareas	20
Table 4-6	Restoration Recommendations for the Cedar River Tier 2 Subareas	21
Table 4-7	Basin-Wide Protection Recommendations for Tier 1 Subareas (Upper Bear, Lower Bear, Cottage Lake Creek)	27
Table 4-8	Tier 1 Reach-Level Protection Recommendations (Upper Bear, Lower Bear, Cottage Lake Creek)	28
Table 4-9	Basin-Wide and Reach-Specific Restoration Recommendations for Tier 1 Subareas (Upper Bear, Lower Bear, Cottage Lake Creek)	31
Table 4-10	Restoration Recommendations for NLW Migratory & Rearing Areas	32
Table 4-11	Basin-Wide Protection Recommendations for Tier 2 Subareas (Evans, Little Bear, North and Kelsey Creeks)	34
Table 4-12	NLW Chinook Tier 2 Reach-Level	34
Table 4-13	Basin-Wide and Reach-Specific Protection Recommendations for Issaquah Creek Tier 1 Subareas	39
Table 4-14	Issaquah Creek Tier 1 Reach-Level Protection Recommendations	40
Table 4-	Basin-Wide and Reach-Specific Restoration Recommendations for Issaquah Creek Tier 1 Subareas	41
Table 4-15	Restoration Recommendations for Issaquah Migratory and Rearing Areas	42
Table 4-16	WRIA 8 Goals and Objectives for Habitat and Chinook Populations	54-55
<b>Chapter 5.</b>	<b>Actions to Achieve Our Goals</b>	
Table 5-1	Assumptions about linkages between Technical Committee habitat conservation hypotheses, proposed actions, and viable salmon population parameters	7
<b>Chapter 6.</b>	<b>Measures and Monitoring for Gauging Progress</b>
